

Claims

1. A collapsible box comprising:

- a front wall;
- a rear wall;
- 5 opposing end walls;
- a bottom wall;
- e. wherein said walls are operably engaged to selectively convert from an assembled condition defining a recess to a collapsed condition for storage.

2. A collapsible box as defined in claim 1, wherein said bottom wall is pivotally attached to said front wall.

10 3. A collapsible box as defined in claim 1, wherein said bottom wall is pivotally attached to said rear wall.

4. A collapsible box as defined in claim 1, wherein there are two opposing end walls, each defining a pivot line delineating front and rear portions.

15 5. A collapsible box as defined in claim 1, wherein each of said plurality of said walls is oriented in a vertical orientation when in the stored position.

6. A collapsible box as defined in claim 1, further comprising a lid.

7. A collapsible box as defined in claim 6, wherein:

- 20 said lid defines a front edge; and
- b. a lip is pivotally attached along said front edge.

8. A collapsible box for use in the bed of a pick-up truck, said box comprising:

- a front wall;
- b. a rear wall;

- c. opposing end walls;
- d. a bottom wall;
- e. wherein said walls are operably engaged to selectively convert from an assembled condition defining a recess to a collapsed condition for storage.

5 9. A collapsible box as defined in claim 1, wherein said bottom wall is pivotally attached to said front wall.

10. A collapsible box as defined in claim 1, wherein said bottom wall is pivotally attached to said rear wall.

11. A collapsible box as defined in claim 1, wherein there are two opposing end walls, each defining a pivot line delineating front and rear portions.

12. A collapsible box as defined in claim 1, wherein said plurality of said walls is oriented in a vertical orientation when in the stored position.

13. A collapsible box as defined in claim 1, further comprising a lid.

14. A collapsible box as defined in claim 13, wherein:

- a. said lid defines a front edge; and
- b. a lip is pivotally attached along said front edge.
